CYLINDER OPTIONS

Player Adjustable Seat Height
Maximum adjustable seat-height range.

Player Adjustable Seat Height + PASH SAFEGUARD
Adjustable comfort with an added level of safety.

Spring Cylinder
Simple, fixed-height seating with added cushioning and mechanical simplicity.

Player Adjustable Seat Height

Maximum Adjustability

Seat Height: 20.5 - 25″
Adjustment Range: 4.5″

Key Benefits
- Widest adjustable seat height range
- Accommodates upright and slant-top cabinets
- Additional Cushioning for seated comfort
- Integrated Auto-Return Swivel
- Standard adjustable-height option

Our standard **Player Adjustable Seat Height (PASH)** option provides the greatest range of seat height adjustment, allowing players to easily find their preferred seating position.

The pneumatic gas cylinder provides 4.5″ of adjustment for enhanced seated comfort. Its broad adjustment range also allows a single stool specification to accommodate both upright and slant-top gaming cabinets.

An integrated **Auto-Return Swivel** returns the seat to its original height and centered position after use.

Warranty: 1 Year

STANDARD PASH BASE

PASH BASE WITH COLUMN COVER

GASSER RECOMMENDED

Player Adjustable Seat Height + PASH Safeguard**

Enhanced Safety & Adjustability

Seat Height: 23 - 25″
Adjustment Range: 2″

Key Benefits
- Added safety spring
- Helps cushion downward movement in the event of cylinder failure
- Accommodates upright and slant-top cabinets
- Additional Cushioning for seated comfort
- Integrated Auto-Return Swivel

The **Gasser Safety Spring** combines the convenience and comfort of our **Player Adjustable Seat Heigh**t system with an added mechanical safety spring designed to provide an additional level of protection.

The spring works in conjunction with the pneumatic gas cylinder to help cushion and control downward movement in the event of cylinder failure. This provides enhanced peace of mind while maintaining 2″ of player-adjustable seat height.

The adjustment range can accommodate both upright and slant-top gaming cabinets while an integrated **Auto-Return Swivel** returns the seat to its original height and centered position after use.

Warranty: 1 Year

PASH BASE WITH SAFEGUARD

Gasser Spring Cylinder

Simple, Non-Adjustable Comfort

Seat Height: Fixed
Adjustment Range: None

Key Benefits
- Fixed, consistent seat height
- Added cushioning for seated comfort
- Mechanically simple design
- No pneumatic height-adjustment system
- 360° Self-Return Swivel
- Ideal when adjustable seat height is not required

The **Spring Cylinder** provides the simplicity of a fixed-height stool with added cushioning for a more comfortable seating experience.

Unlike a pneumatic adjustable-height cylinder, the mechanical spring does not rely on gas pressure to maintain seat height. The spring provides cushioning during initial seating and subtle vertical movement while in use.

A standard **360° Self-Return Swivel** automatically returns the seat to its centered position after use.

Warranty: 1 Year

FIXED HEIGHT BASE W/ **SPRING CYLINDER**

STANDARD FIXED HEIGHT BASE

****PASH Safeguard Disclaimer:** The PASH Safe Guard is designed as a safety device to help protect the occupant in the event of a sudden gas cylinder failure. It is not intended to allow the chair to remain in normal operation after a gas cylinder has failed. Once a defective cylinder has been identified, the chair should be removed from service and repaired as soon as practical. The PASH Safe Guard was not designed, tested, or validated for continuous use or continuous play with a failed gas cylinder.
